EDUCATION

FAST NUCES, Lahore | Bachelor of Computer Science

August 2019 – December 2023

PROFESSIONAL EXPERIENCE

Freelance Full Stack Developer | React, Typescript, Laravel, Clerk, Docker, AWS S3

April 2025 – Present

TaskHorse – Multi-Tenant Task Management SaaS

- Designed and developed a fully functional task management SaaS for teams with multi-tenancy, RBAC, and real-time dashboards.
- Built the frontend with React + TypeScript, styled using Tailwind CSS, and enhanced with Framer Motion animations.
- Integrated Clerk authentication with JWT-based access for admins and team members; synced organization users via webhooks.
- Managed global user state with Zustand and enforced role-based UI & API security using Laravel Policies.
- Developed reusable components, modals, filterable dashboards, and Chart.js-based task statistics.
- Architected the backend in Laravel, exposing secure REST APIs with project-task structure and AWS S3 file storage.
- Set up CI/CD with GitHub Actions, automated Docker builds, and deployed to Digital Ocean using isolated containers.

Full Stack PHP Developer | Anomoz Softwares (Remote)

March 2024 – March 2025

- Worked on 20+ projects across CRM, and E-commerce platforms.
- Integrated Google Maps API & Calendar API for location-based & scheduling features.
- Built dynamic dashboards, reporting modules, and role-based access control.
- Integrated payment gateways, automated invoice generation, and real-time notifications.
- Developed responsive UIs using Bootstrap, JavaScript, jQuery, and AJAX.
- Worked in agile sprints, collaborating on multiple tasks across projects.
- Managed and optimized databases to ensure fast and accurate data retrieval.

ACADEMIC EXPERIENCE

Doctor Appointment System – PHP/MySQL

January 2023 – July 2023

- Created multi-role modules: patient appointment booking, doctor schedules, and admin controls.
- Built with PHP, MySQL, and core MVC logic for real-world clinic scheduling use

Posts Management System - Laravel

June 2023 – July 2023

- Built a post CRUD system with Laravel MVC, Blade templates, and Eloquent ORM.
- Integrated user auth, validation, and user-post relationships.

CERTIFICATIONS & AWARDS

- **CS50's Introduction to Computer Science** - Harvard edX
- **Backend Development and APIs** – FreeCodeCamp

TECHNICAL SKILLS

- Languages: PHP, JavaScript
- Frameworks: Laravel, Express.js, React.js, Node.js
- Databases: MySQL, MongoDB, MSSQL
- Web Development: HTML5, CSS3, Blade Templates, RESTful APIs, AJAX, jQuery
- Deployment & DevOps: Docker, GitHub Actions, Digital Ocean
- Version Control: Git, GitHub
- Testing & Debugging: Postman
- Project Management: Agile
- Language: Urdu (native), English(fluent)
- *Interests:* Machine Learning & AI Research, Asphalt 9 Player
